

## GLASS COCKPIT TRANSITION TRAINING

Expand your flying by learning the glass cockpits of today's light aircraft. See us for a safer and more enjoyable transition.

### In Addition, IFR Pilots will:

- Learn how to develop and set realistic personal minimums
- Glass cockpit scanning and control techniques
- Build autopilot skills in IFR operations
- Refine instrument approach techniques

### Master the new glass cockpit through classroom orientation and simulating typical flight scenario

- Make the best of the new cockpit displays
- Manage risks and reduce workload with cockpit automation “best practices”
- Learn how you can use the technology to make night flying and mountain flying safer

Billed on a “per hour” basis
